Introduction

This newsletter covers the activities of the Warwickshire Fungus Survey during 2016 as recorded by the group members and although its primary purpose is to present the mycological records, other articles and contributions would be welcome. The records generally concern the foray programme but non-foray records from individuals and other groups have also been included particularly where they represent a new site record or an unusual / interesting occurrence. Where available, habitat and substrate information has been noted and observers are urged to record this important data whenever possible.

Reminder: Would forayers submitting dried specimens for the herbarium please ensure that they are accompanied by notes, particularly of characters that cannot be checked from dried material. These include, for agarics, fresh colour and any colour changes with age, handling or bruising and changes to the flesh colour when the fruit body is longitudinally sectioned; is the cap and or stem viscid, sticky?; peelability of the cap (*Russula*), milk colour and changes on drying (*Lactarius*); smell; taste. Also please provide a spore print and details of the literature consulted in arriving at a determination.

Species names have generally been taken from the *Checklist of the British & Irish Basidiomycota* (N. W. Legon, A Henrici *et al*) and the British Mycological Society's computerised dictionary of fungus names (GBCHKLST, 11.01.09). Where this name differs from older names and is not yet in common usage, the older name is indicated in brackets for the first mention. In certain cases where species have been 'lumped' the original name is listed for future clarity. Note that updates 1–7 to the above checklist are now available at website <http://www.basidiochecklist.info>. However, the latest mass changes to familiar species have not yet been included in this newsletter. References to the *Flora* relate to Clark, M. C. (1980) *A Fungus Flora of Warwickshire*.

The WFS website may be accessed by address <http://wfs.bnhsoc.org.uk>.

* indicates new to site. Up-to-date lists are not available for all sites.

** indicates new to vice-county 38.

The following recorders have been identified by their initials and are shown in the sequence collector/determiner/confirmer (where different):

DJA	David Antrobus	WTM	Bill Moodie		
AWB	Bert Brand	KR	Kay Reeve	GT	Graham Thompson
GMB	Gill Brand	JRR	John & Val Roberts	JW	John Williams
DC	Dave Champion	RJS	Jane Sells		
DG	Dinah Griffin	JDS	John Sells		

Unless stated otherwise the following plant/tree species may be inferred from their genus:

Genus	Species	Genus	Species
Aesculus	<i>Aesculus hippocastanum</i>	Fagus	<i>Fagus sylvatica</i>
Alnus	<i>Alnus glutinosa</i>	Fraxinus	<i>Fraxinus excelsior</i>
Betula	<i>Betula pendula</i>	Ilex	<i>Ilex aquifolium</i>
Castanea	<i>Castanea sativa</i>	Quercus	<i>Quercus robur</i>
Chamerion	<i>Chamerion angustifolium</i>	Rubus	<i>Rubus fruticosus</i> agg.
Corylus	<i>Corylus avellana</i>	Taxus	<i>Taxus baccata</i>
Crataegus	<i>Crataegus monogyna</i>	Urtica	<i>Urtica dioica</i>

WARWICKSHIRE FUNGUS SURVEY

Foray Records

2016

The fungus season continues to follow its now familiar pattern with fewer records in early autumn and more records later in the year. For Warwickshire this means fewer mycorrhizal species. By careful searching and specialising interesting specimens can be found. I (JDS) have a continuing disappointment in the number of Russulales recorded on the foray programme: for 2016 these were for *Lactarius* sp. just one record – *L. subumbonatus* and *Russula* sp. six records. Unfortunately it is not just these: there were only four records of *Amanita* sp.; one record of *Tricholoma* sp.; one of *Clitocybe nebularis*; three of *Rhodocollybia butyracea*; four of *Laccaria laccata*; two *Inocybe* sp.; one *Hebeloma* sp.; and not a single *Cortinarius* sp.

Coombe Abbey Country Park

15.05.16

Seven regulars attended the first foray of the year on a dry sunny morning not expecting to find many fungi.

PHYCOMYCETES		PERONOSPORALES
Peronospora ficariae	<i>Ficaria verna</i> , living leaf	GMB
Peronospora niessliana	<i>Alliaria petiolata</i> living leaf	GMB

Gloeophyllum sepiarium	wooden fence rail	JDS
Laetiporus sulphureus	log	DC
Phellinus igniarius	on felled <i>Salix</i>	JDS
Polyporus squamosus	on <i>Acer pseudoplatanus</i>	DC
Schizopora paradoxa	very rotten fallen wood	AWB/GMB
Tremella gibbosa	on <i>Castanea</i>	DC
UREDINIOMYCETES		USTILAGINALES
Entyloma ficariae (T)	<i>Ficaria verna</i> , leaf	GMB
FUNGI IMPERFECTI		HYPHOMYCETES
** Mastigosporium muticum	<i>Dactylis glomerata</i> senescent leaf	GMB
		COELOMYCETES
Septoria lamii	<i>Lamium album</i> senescent leaf	GMB

Pooley Fields Nature Reserve SSSI

04.09.16

It was a cloudy, warm and windy day. Only four members attended to see virtually no fruiting bodies.

HOMOBASIDIOMYCETES		AGARICALES etc.
Boletus cisalpinus		WTM
Marasmiellus ramealis	dead <i>Rubus</i> stem	JRR
Marasmius quercophilus	fallen <i>Quercus</i> leaf	JRR
Mycena polygramma	ground beneath <i>Quercus</i>	JRR
		APHYLLOPHORALES
Daedaleopsis confragosa	dead <i>Salix</i>	JRR
		GASTEROMYCETES
Phallus impudicus	ground amongst <i>Rubus</i>	JRR
Scleroderma citrinum	beside path through <i>Betula</i>	JRR

WARWICKSHIRE FUNGUS SURVEY

Packington Park

18.09.16

We must thank Kay Reeve for organising what was the first visit for most of us to this large estate with grassland, old trees, lakes and woodland. The weather was good as well and heavy showers during the week were encouraging.

MYXOMYCETES

Tubifera ferruginosa DG

HOMOBASIDIOMYCETES

AGARICALES etc.

Agaricus augustus	under <i>Pinus, Quercus</i>	JDS&DJA
Agaricus campestris	grassland	JDS
Agrocybe rivulosa	pile of wood chips	DC&DJA
Amanita fulva	under broad-leaved trees	DG
Amanita rubescens	under <i>Pinus, Quercus</i>	DJA
Bolbitius titubans	grassland	JDS
Boletus badius	under <i>Pinus</i>	JDS
Boletus cisalpinus	under <i>Quercus</i>	JDS
Boletus luridiformis	under <i>Quercus</i>	JDS
Clitopilus prunulus		DC
Conocybe apala	grassland	JDS
Coprinellus disseminatus	stump	JDS
Gymnopus fusipes	base of <i>Quercus</i>	JDS
Hygrocybe conica	grassland	KR
Hypoholoma ericaeoides	in damp grassland with rushes	DJA
Inocybe curvipes	under <i>Betula</i> and <i>Alnus</i>	DJA
Laccaria laccata	grassland	JDS
Leccinum scabrum	under <i>Betula</i>	DC
Macrolepiota procera	grassland	DC
Marasmius oreades	grassland	JDS
Panaeolina foenicisecii	in grass	DJA
Parasola plicatilis	grassland	JDS
Paxillus involutus		DC
Psathyrella corrugis	on woody debris	DJA
Russula amoenolens	under <i>Quercus</i>	JDS
Russula ionochlora		DG

APHYLLOPHORALES

Daedaleopsis confragosa		DG
Fistulina hepatica	on <i>Quercus</i>	DC
Ganoderma australe	on <i>Fagus</i>	JDS
Phaeolus schweinitzii	base of <i>Pinus</i>	JDS&DC
Stereum gausapatum	on <i>Quercus</i>	DG

GASTEROMYCETES
